

The Magic of James P. Riser

The magic apparatus designed and hand crafted by James P. Riser is produced in very limited quantities. One-of-a-kind items will be offered as they are produced. It must be understood that the list of available items is constantly changing as the small quantities are sold and new items are introduced. The current offerings are as described below:

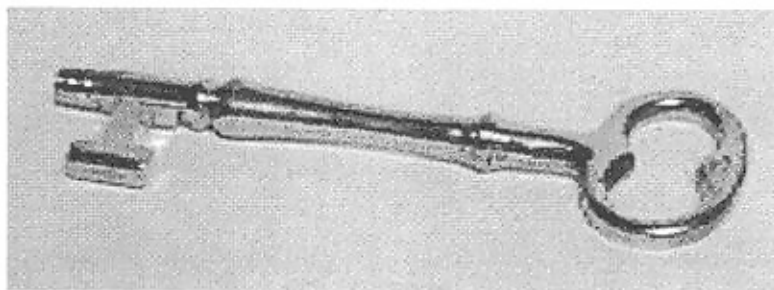

The Solid Cup

The Solid Cup appears to be a highly polished metal cup with which the performer does a quick and neat one cup and ball routine - climaxing with the production of a golf ball. After this production, it is found that the cup can not cover the golf ball as the cup is one solid chunk of metal. **The Solid Cup** with routine only are supplied - constructed of polished aluminum.

Note: At times a larger (baseball sized) cup of solid brass is available. Check for availability of this larger heavy brass model.

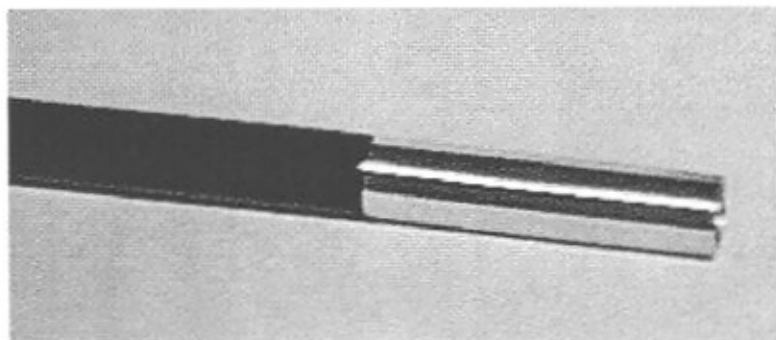

The Brass Key

The Brass Key is beautifully fabricated from pure cast brass. It is then precision machined so that the gimmick is totally invisible and impossible to operate without the necessary release tool. With this piece of apparatus the performer is able to cause a borrowed finger ring

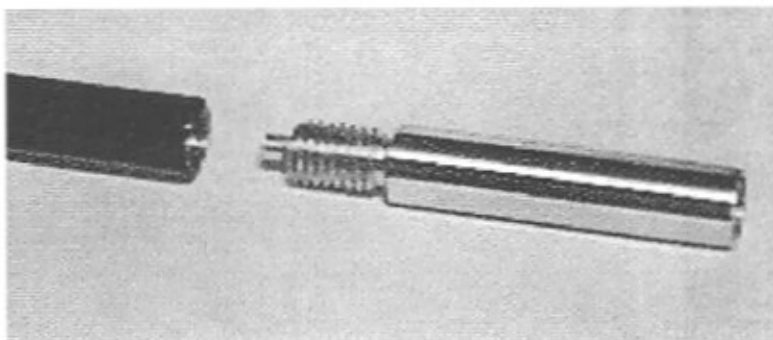

to become locked on the shaft of the key. All may be passed for examination. It appears that a hack saw would be the only way to remove the ring. The performer may easily remove the ring when desired. **The Brass Key** and release tool only are supplied.

The Double Bang Wand

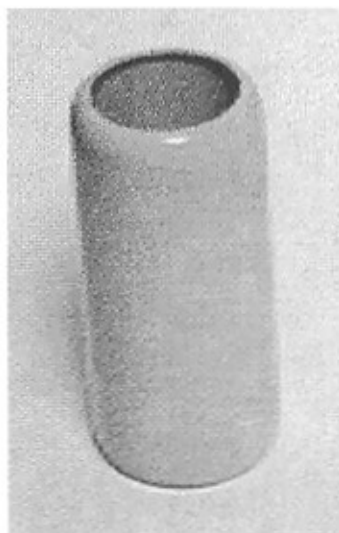

The Double Bang Wand is meticulously crafted from aluminum to keep the weight down. Safety was the biggest concern with this item. Rather than using 22 caliber blanks, I chose to use the infinitely safer, super loud caps that are found at any toy store.

The tips of this beautiful prop are machined to take small balls of flash paper for performers desiring the "ball of fire" with each bang. The cap fits on the small end of the wand tip and is set off by a sliding weight. Wand only supplied.

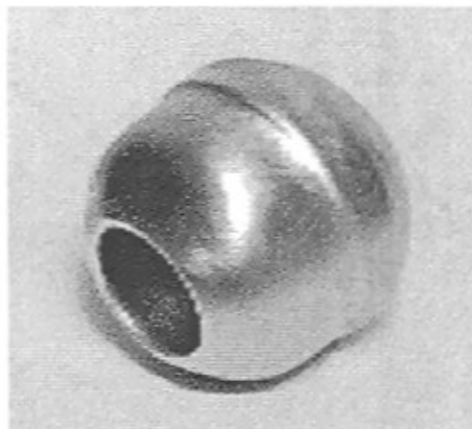

Dye Tube

This Dye Tube is created from aluminum. The ends are carefully spun to create a lip to hold the silk at each end. This Dye Tube has been drilled for those desiring to add a fine monofilament loop for special handling. This type of Dye Tube does not require an internal tape nor sliding cup. There is nothing to get fouled up. For up to 18" silks. Dye Tube only supplied.

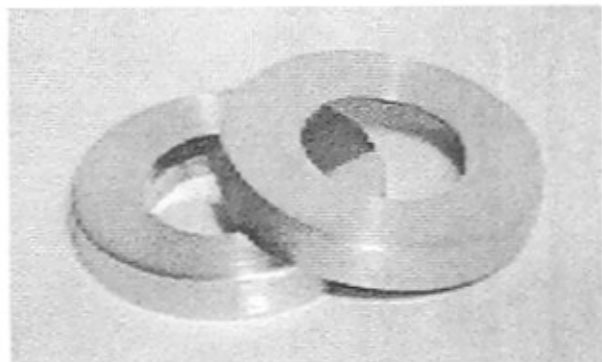

The Palmo Ball

The Palmo Ball has long been unavailable. This version of The Palmo Ball is created from spun aluminum. The Palmo Ball is a specialized type of dye tube. This version of The Palmo Ball is designed for up to 18" silks. The Palmo Ball only supplied.

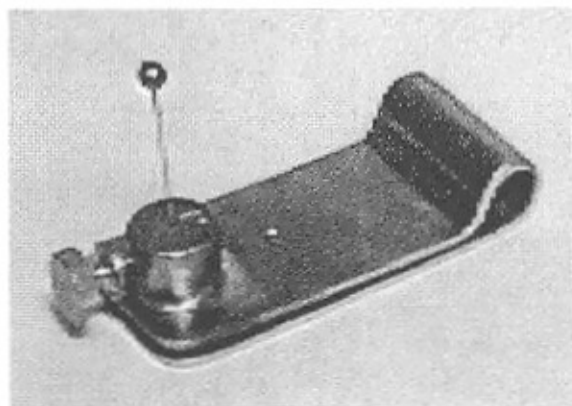

The Aluminum Disc

The Aluminum Disc is created from precision machined aluminum. This item may be used for ring and ribbon or ring and wand tricks. Disc and shell only supplied.

The Card Punch

This apparatus has long been used by crooked gamblers for secretly marking playing cards. Created in pure brass. This **Card Punch** was designed to be used by magicians to secretly mark cards for later location. **The Card Punch** only supplied.

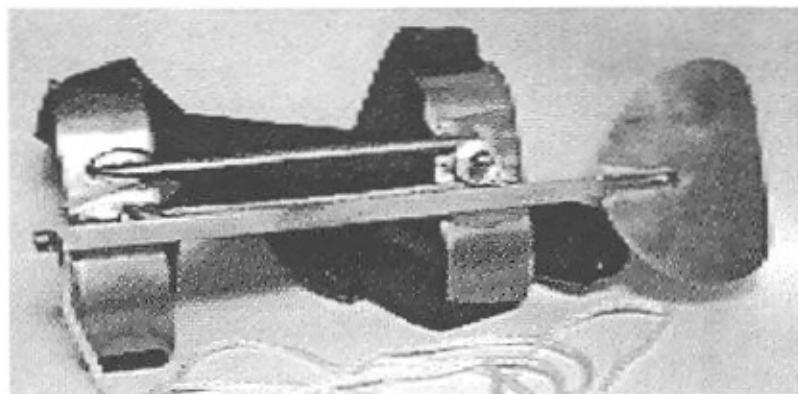

The Riser Holdout

The Riser Holdout is skillfully hand crafted from pure brass for a lifetime of trouble-free service.

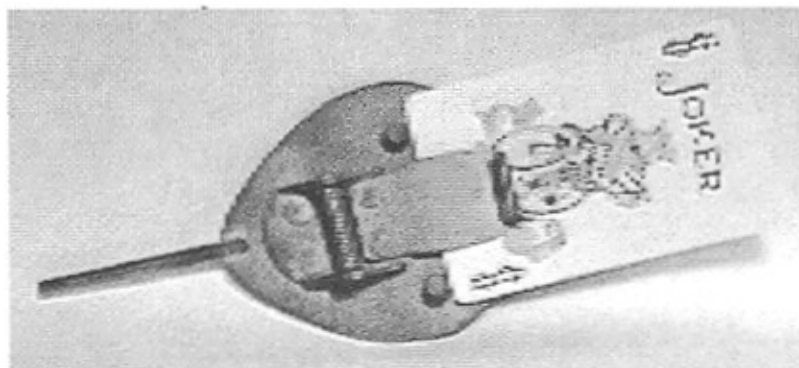

This smooth working and silent holdout is designed after the original and legendary Keplinger version. I have done away with the cumbersome knee spreader and have devised a simple non-binding nylon pull to

dependably operate this precision holdout. This allows almost total freedom of arm movements.

The Riser Holdout is supplied with a single card (or envelope) clip. This wonderful holdout is made for the entertainer only - to be used for switching cards, producing a card as needed, for gambling exposures, or for prediction chests. It was not designed to be used in a game of cards to cheat others! Unlike the old style card holdouts, This holdout is designed to be used while standing and walking around - not just seated. **The Riser Holdout** only supplied.

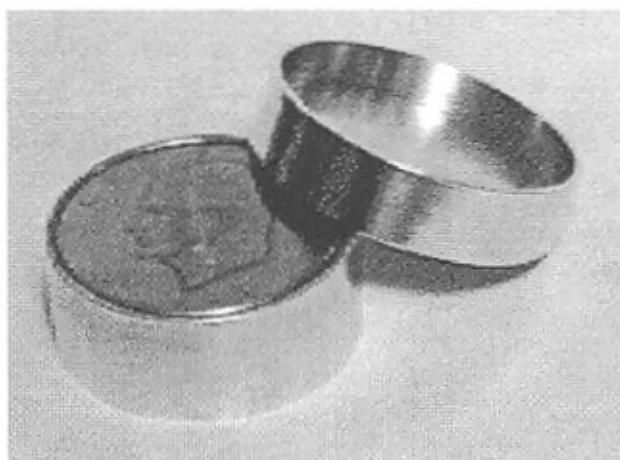

The Multiple Card Clip

The Multiple Card Clip is designed for those needing their holdout to supply or switch out multiple cards. It plugs into the slide of **The Riser Holdout**. **The Multiple Card Clip** only supplied.

The Silver Dollar Box

This beautiful coin box is sized to hold four silver dollars. It can be used for most Okito Box routines. This fine coin box is made of lathe turned solid aluminum and features a semi-polished finish. This box may also be supplied with a recess in the bottom. **The Silver Dollar Box** only supplied.

The Great Salt Trick

In this classic effect, the magician empties a glass salt shaker into the closed fist. This salt is caused to vanish and then to reappear as an apparently endless flowing stream of salt. This item is made from solid brass and has the weight to make it "feel good" while being used. **The Great Salt Trick** gimmick and routine only supplied.
